

100 commonly used Chinese Radicals

Chinese characters can be decomposed into components called radicals or *bushou*. There are 214 radicals in the original Kangxi radical list, but a few of them are no longer used in the simplified Chinese. Being able to recognize the common radicals helps in the learning and recognition of new characters. Some but not all radical are complete characters in their own right. (Some radicals may be not characters so we don't put pinyin for them here.)
